PREFATORY NOTE.

This volume contains a description of all the atlases received in the Library of Congress, from 1914 to the present date.

The titles are all numbered and the sequence is followed throughout each volume. Volume one, published in 1909, contains titles 1–3265; volume two, author list and index; volume three, titles 3266–4087; volume four, titles 4088–5324.

No attempt has been made to make any changes in the descriptive plan of the work. The usefulness of the copious indexes of the previous volumes and the ease with which they may be consulted sufficiently justify the continuance of them as a model. The present volume numbers 1237 titles. The former author lists have been combined in one general alphabet, making a complete index of all the authors whose works are contained in the collection. The prefaces to volumes one and three should be consulted for information as to the method pursued in the compilation of the complete work.

The county atlases of the states of the United States, which make up a considerable portion of this volume, are the atlases in the Division most consulted, especially by the various departments of the Government in their reference work.

The following are some of the rare items, especially to be noted:

MARITIME.

Brouckner, I.

Der erste preussische seeatlas 1749.—"Nouvel atlas de marine. Composé d'une carte générale, et de XII cartes particulières, qui représentent le globe terrestre jusqu'au 82°. degré du côté du nord, et jusqu'au 60°. du côté du sud. Le tout dressé sur les observations les plus nouvelles et les plus approuvées. Dédié à son excellence mgr. le comte de Schmettau . . . Approuvé par l'Académie royale des sciences à Berlin l'année 1749."—Herausgegeben von dr. M. Groll. 1 p. l., [3] pp., 14 maps. fol. Berlin, D. Reimer (E. Vohsen) 1912. 4146

NOTE.—"Avertissement sur l'atlas de marine, publié à Berlin 1749." p. [3] Has accompanying facs. map entitled, "Carte pour résoudre les six problèmes. 1749."

For original atlas see v 1, title 612. Reprint of original title in cartouche.

Title of original atlas, also on map no. 3.

This is a photo-lithographic reproduction of the sheets of the *Nouvel atlas de marine* prepared by the geographer Isaac Brouckner, by order of field-marshall

Brouckner, I.—Continued.

count Samuel von Schmettau, who did so much in Prussia to raise the level of the scientific undertakings, not only theoretical but practical, of the Berlin Royal academy of sciences during the eighteenth century. In order that this atlas might be as complete as possible, Count von Schmettau placed at Brouckner's disposal all the sheets and memoirs that were available, which were dealt with in a masterly way by the geographer, with the result that a most creditable marine atlas for the time was prepared, which certainly deserves to be designated as the first Prussian marine atlas.

This atlas has now been reproduced under the editorship of Dr. M. Groll, who has also written an interesting note to accompany it, to which he has appended a list of the other cartographical works undertaken by the academy about the same period. Dr. Groll states that only three copies of the original atlas are known to him to be in existence, one of which is in the Congress Library at Washington, the second at the Nordenskiöld library at Helsingfors, and the third in the library of the Grand duke at Weimar; and it is from the last of these that his facsimile has been taken." Seller, J.

Atlas maritimus or a book of charts: describing the sea-coasts, capes, headlands, sands, shoals, rocks & dangers; the bayes, roads, harbors, rivers, and ports in most of the known parts of the world. With the true courses & distances from one place to another, gathered from the latest & best discoveries that have been made, by divers able & experienced navigators of our english nation: accommodated with an hydrographical description of the whole world. Sold by James Atkinson at Cherry-garden-staires on Rotherhith wall. 1 p. l., 10 pp., 26 maps. fol. [London, 1670?] 4150

NOTE.—Copy A. All copies of Seller's *Atlas maritimus* differ in contents. The Dictionary of national biography, says that Seller published a folio volume of charts and sailing directions under the title of the '*English pilot*' in 1671, and another called the '*Sea atlas*' the same year, but the present edition without Seller's name on the title-page and marked "Sold by James Atkinson at Cherry-garden staires on Rotherhith wall," judging by the plates is earlier than the undated edition to which the date 1671? has been given, so the date 1670? which has been added in ink on the title-page of copy B, evidently at some early date, is approximately the date. The title-page is a rather crude, early impression

from the plate which is much improved in the later editions. The view of London below the cartouche being a different one showing that the more finished one must have been substituted for it later. In copy A, the title is engraved on a slip and pasted in the center of the cartouche, which in this copy is blank. In copy B (title 4151) the title is engraved directly on the page. The maps of this issue which appear in later editions are here shown in a less finished state. Many of the maps contain the names not only of John Seller, but of John Thornton, William Fisher, James Atkinson, and John Colson, also. John Thornton, who published his *Atlas maritimus, 1702–1703*, is accused by Dalrymple of copying Seller almost verbatim. See v. 3, title 3455.

Copy A contains 26 maps and copy B 19. Of these, nine maps are the same. No. 17 in copy A and no. 11 in copy B, "A chart of the western part of the East-Indies with the adjacent islands from Cape Bona Esperanca to Cape Comorin," the first "By J. Seller, J. Colson, W. Fisher, J. Atkinson, & J. Thornton. F. Lamb sculp.," and the second, "By John Thornton, John Seller, William Fisher, James Atkinson, John Colson," and without Lamb's name as engraver, though very similar, are from different plates.

The fly leaf bears the date "july y^{e} 10, 1699," and the name, "James Day."

With the true courses and distances, from one place to another, gathered from the latest and best discoveryes, that have bin made by divers able and experienced navigators, of our english nation, accomodated with an hydrographicall description of the whole world . . . 1 p. l., 12 pp., 43 maps on 28 sheets. fol. London, J. Seller, [1671?] 4152

Note.—The Library of Congress has a copy of Seller's *Atlas maritimus*, dated 1675 and four undated editions. The title-page of the 1675 edition and of the undated editions as given above differ. For title and half title of 1675 edition, see v. 4, title 4154.

In the *Dictionary of national biography*, under Seller, the first edition of this atlas is referred to as "*the Sea Atlas*," which is the half title of the edition of 1675, also the title of the text in all editions. This states, "In 1671 he [Seller] published a folio volume of sailing directions, under the title of 'The English Pilot,' and another called 'The Sea Atlas,' to which were prefixed letters patent from the king, setting forth that as he (Seller) had been for several years collecting and composing these works it was forbidden 'to copy, epitomise, or reprint' the treatises of navigation; 'to counterfeit any of the maps, plans or charts' in them, or to import them or any part of them from beyond the seas, 'either under the name of Dutch Waggoners or any other name whatsoever,' within the term of thirty years."

Though the half title, "*A sea atlas*," does not appear in this copy, the date 1671? has been assigned to it as the probable date. Many of the same maps appear in the later editions, and a number of them in Seller's *The english pilot. The first book. 1671.*

The title-page is the engraved title-page called "Englands famous discoverers," which shows sketches of "S^r. Fran. Drake, m^r. Tho. Candish, cap. Davies,

s^r. Walter Raleigh, s^r. Hugh Willoughby, cap. Smith. A view of London appears below the cartouche containing the title. This is the same engraved title-page with a different title in the cartouche which is used in the English pilot. The first book. 1671, in Seller's *Coasting pilot*, [*1672*] and in the editions of the *Atlas maritimus*, "sold by James Atkinson," though in the latter case the view of London is quite different, evidently an earlier unfinished impression of the plate, and showing that another plate of the view of London must have been substituted later. Some of the maps also in the editions sold by Atkinson are earlier impressions of the plates.

There are 10 pages of text in the Atkinson editions and 12 pages in the 1671? and 1672? editions only 1 page of which is new, the other being made by the difference in the print. There are some small differences in the text, the editions of 1671?, 1672? and 1675 being the same impression, and the two editions sold by Atkinson of 1670? being alike. In this edition, the map no. [9] Comitatus Zelandiae . . . 1657, is inserted.

The engravers as far as stated are given in the contents.

Atlas maritimus, or the sea-atlas; being a book of maritime charts. Describing the sea-coasts, capes, headlands, sands, shoals, rocks and dangers. The bays, roads, harbors, rivers and ports, in most of the known parts of the world. Collected from the latest and best discoveries that have been made by divers able and experienced navigators of our english nation. Accommodated with a hydrographical description of the whole world; shewing the chief cities, towns, and places of trade and commerce; with the nature of the commodities and merchandizes of each country; very useful for merchants, and all other persons concerned in maritime affairs . . . 3 p. l., 12 [2] pp., 42 col. maps, 7 col. pl. fol. London, by J. Darby, for the author, 1675. 4154

Note.—Corrected title, see v. 1, no. 487.

Colored engraved half title reads: *A sea atlas describing the sea coasts in all the known parts of the world* . . . It contains portraits of sir Francis Drake and mr. Tho. Candish.

The main title-page differs from those of 1671? and 1672? and from the editions of 1670?, sold by James Atkinson, which do not carry Seller's name on the title-pages, and which are undoubtedly the works mentioned in the Privilege to this one in the following manner: "We are informed that endeavours are

made by some of our subjects, secretly to copy and reprint the same, [the Sea-atlas] under another title, to the great prejudice and discouragement of the said John Seller."

Of this 1675 edition of the *Sea atlas*, Seller says in his preface that it was "the first essay of this nature that hath been compleated in England."

The [2] pp. mentioned in the collation, give "A catalogue of mathematical instruments, made and sold by John Seller", and "A catalogue of mathematical books, maritime charts, draughts, etc."

In the London Stationer's company. *A transcript of the registers of the worshipful company of stationers, from 1640–1708. A. D. London, 1914*, the following entry appears in connection with an edition of this work: "30 November 1679. Entred . . . by vertue of a licence from his Matie whereunto the hand of Master Warden Vere is subscribed one book or coppy entituled Atlas Maritimus, or Sea Atlas, being a book of martime charts, describeing the sea coasts, capes, headlands, sands, shoals, rocks, &c. By John Seller, hydrographer to the king. And alsoe one other book entituled, The English Pilot, the second book containeing the sea coasts, capes, headlands, soundings, sands, shoals, rocks, &c, by the same author."

1375

[**Atlas of the world.** anon.] fasc. 2 pl., 3 maps. fol. [Paris, 1841] 4251

NOTE.—Known as "Atlas catalan." Maps similar to those published to accompany article by J. A. C. Buchon and J. Tastu, entitled: *Notice d' un atlas en langue catalane, manuscrit de l'an 1375 conservé parmi les manuscrits de la bibliothèque royale*, in *France. Académie des inscriptions et belles-lettres. Notices et extraits des manuscrits de la bibliothèque du roi. 4°. Paris, 1841. v. 14, pt. 2. pp. 1–152.*

Date 1375 found in pl. 2.

On the 1st pl. are four columns of text in gothic letters of the XIVth century. The first column contains an expose of the various influences of the moon during thirty days. In the 2nd column are two circular diagrams relating astronomy and geography. Below these is the drawing of a man with the names of the signs of the zodiac, and a table showing the corresponding months and days.—The third and fourth column contain text relating to geography and cosmography.—The second plate contains a large circular diagram formed of 37 circles. In the corners of the plate are four figures representing the four seasons. The first map contains the countries of western Europe and northwestern Africa. On the second map are eastern Europe as far as the eastern shore of the Black sea, and northeastern Africa and Palestine. The third map contains eastern Asia.

The maps to accompany the article above noted contain in the lower right corners their consecutive numbers and the reference to the pages where they should be inserted. These do not appear on the maps of this atlas.

Atlas minor. 2 v., 1 pl., 127 col. maps, 2 pl.; 1 pl., 124 col. maps. fol. Amstelodami, F. de Wit, [1634–1708] 4254

Note.—Each volume has an elaborate engraved, colored title-page, the first signed "G. Laeiresse invent. A. Blooteling sculp" and the second, "Laüwerens Scherm. delin. & sculp."

In v. 2, at head of title, "Londini apud Christophorum Browne."

Title-page to v. 1, gives no place, publisher or date; the place and publisher in v. 2, being repeated in dutch and between the two imprints a small circle contains the words, "Sold by Christopher Browne at y globe at the west end of Saint Paull's church".

Both volumes have manuscript lists of the maps.

Beside those by de Wit the maps are by various cartographers. Only a few of them are dated, the earliest being 1634 and the latest 1708.

First edition 1624.

Woltersdorf gives 33 editions and Tiele gives an edition of 1627 not given by Woltersdorf.

The following map relates to America:

no. 1. Typus orbis terrarum.

1641–1729

Ottens, R.

Atlas maior cvm generales omnivm totius orbis regnorvm rervmpvbl. atqve insularvm tvm particvlares praecipvarvm in iis provinciarvm dvcatvvm comitatvvm ceterarvm qve minorvm regionvm ac divisionvm tabvlas geographicas continens ex optimis ac novissimis qvibvsqve variorvm avtorvm tabvlis collectvs et eleganti ordine dispositvs ab Reinero Ottens. 7 v. fol. Amstelædami apud viduam ac filios Ioachimi Ottens [1641–1729] 4257

NOTE.—The atlas contains 835 miscellaneous maps by various cartographers and many plates, with a general title-page in each volume.

From the nature of the contents it is probable that few copies were placed on the market.

In all volumes except the first the imprint reads: "Amstelædami apud Reinervm et Iosvam Ottens," and the words, "In [blank] tomos divisvs," follow the title.

The cartouche on the title-page of each volume is signed, "F. Ottens inv. et fecit 1724," and is elaborately colored in v. 1. Tiele gives examples of this atlas from Bodel Nijenhuis in 3 v. and as quoted from Muller's *Cat. Amer. Pars. III*, in 4 v. which contain the map "Berbice, 1740," also an example in the University at Amsterdam in 7 v.

Maps in the present copy are dated from 1641–1729. The maps are engraved and handcolored and are richly ornamented with fruits, flowers, cupids, shields figures in the costumes of the time and country, small portraits, and views showing customs and historical events.

Many maps have short lists of explanations. The long lists are mentioned in the note to the map.

The maps of cities are very elaborate.

In v. 1, there is an elaborately engraved, colored secondary title-page with the word "Atlas" in a scroll at the top and the imprint, Amstelædami apud viduam

Ottens, R.—Continued.

ac folios Joachim Ottens, signed I. van Munnickhausen sculp., L. Webbers pinxit.

The first volume has several maps of the world in hemispheres, including Homann's map which appears also in v. 2 and v. 3. Maps of the world in hemispheres appear in the other four volumes, that in v. 7, being the same as the one in v. 4.

Volume 4 contains the whole of Schotanus â Sterringa's *Uitbeeldinge der heirlijkheit Friesland*, published by F. Halma, 1718, including the elaborate title-page and large plates of coats of arms and the maps augmented by those of Alting. A series of maps by Fricx also appear in this volume. The atlas is an unusually fine one and contains many rare maps, the maps of America in v. 7 being of great interest and include Ottens' Totius Neobelgii, with the "Restitutio" view of New York.

The contents of the maps which follows has been carefully annotated.

Sanson, N., *d'Abbeville.*

Cartes générales de tovtes les parties dv monde, ov les empires, monarchies, republiques, estats, peuples, &c. de l'Asie, de l'Africqve, de l'Evrope, & de l'Américqve, tant anciens que nouveaux, sont exactement remarqués, & distingués suivant leur estenduë . . . 2 p. l., 113 (*i. e.* 117) maps. fol. Paris, l'avthevr; P. Mariette, 1658. 4260

Note.—"Table des cartes générales de toutes les parties du monde," on the two pages following the title-page. The "Table" contains the names of 113 maps, of which one map is wanting in this copy. Four maps not called for by the "Table" are inserted. The inserted maps follow:

Sardones. Eves^{ché} de Elne ou Perpignan. L. Cordier sc. 1660.
La Prusse. Somer sculp. 1659.
La Curlande. Somer sc. 1659.
Principauté de Catalogne. L. Cordier Abb. sculp. 1660.
The maps are dated from 1632 to 1660.

Sanson, N., *d'Abbeville*—Continued.

Of the maps in this edition Pierre Mariette appears as the publisher of forty two; Melchor Tavernier's name and address as well as Pierre Mariette's appears on sixteen maps; M. Tavernier on one; the author as publisher on twenty-eight; the author and P. Mariette on two; and on twenty-seven maps no publisher is given.

As engraver, the name of J. Somers, sometimes given Sommers and sometimes J. Somers Pruthenus, appears on thirty-six; A. Peyrounin on eight; Riuière on one; R. Cordier on fourteen; L. Cordier on three; A. de la Plaes or Plaets on four; fifty maps are without engraver's name.

The earliest date of which a record has been found of the collection of Sanson's maps with this title is found in Woltersdorf. *Repertorium der land-und seekarten*, p. 103. It reads:

"1645. *Sanson.* Cartes générales de toutes les parties du monde etc. par Sanson d'Abbeville Paris chez l'auter et Mariette gr. Af. 98 karten. Andere zälen 104 Bl. Dabei ist gewöhnlich Sansonis d'Abb. Systema geogr. per tabulas repraesentatum Paris 1644. 100 geogr. Tabellen."

A map entitled, Sabaudia, ducatus la Savoie, similar to the Sanson maps, has been inserted in place of map no. 76, Etats de Savoye, which is wanting.

Blaeu, J.

[Atlas mayor, sino Cosmographia Blaviana, en la qual exact. se descrive la tierre, el mar y el cielo] 10 v. fol. [Amsterdam, J. Blaeu, 1659–1672] 4262

Note.—The spanish edition of Blaeu was brought out in 1659–1672. The arrangement is that of the latin edition of 1662–1665, though the volumes have not been numbered as in the latin edition. The volume numbers of the corresponding volumes of the latin edition have been assigned in this case. The eleventh volume containing America was never published, and Africa was omitted from v. 9, which contains the Africa section in the latin edition. Also the section, Suecia, appears in v. 1, in the spanish instead of v. 2, as in the latin edition. The spanish edition is very rare, as almost the whole edition was destroyed by fire in 1672, when the publishing house of Blaeu was burned. This copy does not contain the general title-page for the work and many of the parts lack any title-page at all.

The volumes of this set are bound in green velvet.

A list of the maps contained is found at the end of each volume. These maps are the same as those in the latin edition [1662–1665] described in v. 3, title 3430. The beauty of the coloring is unusually well preserved.

The differences between this copy of the spanish edition and the Library of Congress copy of the latin edition with other descriptive matter are here noted.

v. 1. Does not contain general title-page, title-page to volume or half-titles to sections. The general title-page is not contained in any volume of this set.
Pages 81–82 with the map of Europe, wanting.
Map, reyno de Gocia, wanting. Text included.
Pintura de Steleburg . . . wanting.
Quadrante mural, o de Ticho, wanting.
Manillas del Equador, wanting.
On p. xvij, Capatania de Tonderen, shows some difference from same map in latin edition.

v. 2. No title-page to the volume, and no half titles to the sections.

" 3. Title-page to the volume is dated 1662.
Pages 51–52, Grotkaw, o Nissa duquado, wanting.
" 323, Territorio de Francfort sobre el Mein, wanting.
" 335, El Danubio, map wanting.
Opp. p. 366, Territorii Lindaviensis pars septentrionalis, inserted.

" 4. Title-page to volume dated 1663. Has title-page to second part.

" 5. No title-page.
Pages 65–66, La Bretaña en la forma que se divido en tiempo de los Anglo-Saxones . . . wanting.

" 6. No title-page. Privilege dated 1664.

" 7. Title-page to volume dated 1662. Contains all preliminary leaves.
Opp. p. 74, Dioecesis Ebroicensis vulgo l'Eveschè d' Evreux, inserted.
Opp. p. 204, Episcapatvs Albiensis, inserted.

" 8. Title-page to volume dated 1669. Contains all preliminary leaves.

" 9. Title-page to volume dated 1672. Contains illuminated half title-page, with all preliminary leaves. Africa section omitted.

" 10. Title-page to volume dated 1658. Contains illuminated title to Martini's Novvs atlas Sinensis, dedication and privilege.

For extensive note on the latin edition, and table of contents of each volume, see v. 3, title 3430.

Blaeu, J.

Atlas maior sive Cosmographia Blaviana, qva solvm, salvm, coelvm, accvratissime describvntvr. 11 v. fol. [Amstelaedami, I. Blaev, 1662–1672] 4263

Note.—The dates and voluming of this edition are the same as in another copy dated 1662–1665, which is in the Library of Congress, except that v. 9 is dated 1672. See v. 3, title 3480.

Vol. 5, "Anglia," and v. 6, "Scotia, Hibernia," have half titles dated 1646 and 1654 respectively.

Although most of the maps are the same as in the other Library of Congress copy, many have a different arrangement of the text on the reverse, with varying signatures, and some of the maps are different. The text of v. 6, "Scotia, Hibernia," is from entirely different plates though the maps are the same. It has "Privileges" in dutch and latin and one in english granted by Oliver Cromwell and dated 1654, which indicates that this issue of v. 6 may have been part of a set brought out for use in England.

The ninth volume "Hispania, Africa," dated 1672, is in spanish and belongs to the spanish edition, "Atlas mayor, sino Cosmographia Blaviana," issued 1659–1672. See Tiele, *Nederlandsche bibliographie van land- en volkenkunde*.

In v. 10, Martini's China has a two page index not in the other Library of Congress copy.

In v. 11, which is devoted to American maps, the text is the same but printed from different plates. All maps are those called for by the index except map on p. 1-2, "Novissima et accuratissima totius Americæ descriptio per N. Visscher," which is substituted for "Americæ nova tabula. Auct. Guiljelmo Blaeuw," in other copy, and map on p. 213–214, "Nova et accurata Brasiliæ totius tabula, auctore Ioanne Blaev," which is substituted for "Brasilia . . . excudebat Ioannes Blaeu."

For contents of maps see v. 3, title 3480.

no. [1] Mappe-monde ou globe terrestre en deux plans hémisphères, dressée sur les observations de m^{rs}. de l'Académie royale des sciences, Sanson, Nolin, du Fer et principale^{mt} sur la carte que monsieur Nicolas Witsen. a donnée au public. Insets: [Arctic regions] 4½ in. diam.—]Antarctic regions 4½ in. diam.—Two astronomical hemispheres, each 4½ in. diam. In 4 sheets; sheets 1 & 3: 20×27; sheets 2 & 4: 21¼×27.—In two hemispheres, each 27 in. diam.; ornamented in the upper and lower border with engraved illustrations of passages of the Genesis; six of which are in circular frames in the upper margin, the others in the right and left corners.

The latest date found in the map is 1699—near the mouth of the Mississippi river is the note: "Col. françoise en 1699," also on the western coast of Scotland: "I. nouvellement découv. en 1699."

On this map is shown S^{t}. Petersbourg, which was founded in 1703.

The Library of Congress has a similar map of the world by J. B. Nolin, dated 1708, in two hemispheres, with the same border illustrations, with slight variations.

On that map is the notice "Débouchement du détroit d'Anian *par où un vaisseau hollandais communiqua* de la mer du Nord à la mer du Sud . . . " It also shows the "Detroit connecting the two oceans."

On the 1703? map, however, is the notice: "*On croit sur de fortes conjectures* que par le Détroit d'Anian *on peut communiquer* de la mer du Sud à la mer du Nord, mais personne n'a encor hazardé la navigation de ce détroit, on en a seulement reconnu les entrées." Besides these statements the 1708 map contains much more geographical information than the other, especially in North America.

In the Pacific ocean, on the 1708 map, near the straits of Magellan is the notice: "J'ai posé le détroit de Magellan entre les 50.51^{d}· de latitude, ce qui est different de ce que les autres géographes ont cy devant fait . . . je n'étais contenté dans ma première mappemonde de marquer l'endroit au Sud où il avoit été jetté sans m'expliquer". In the 1703? map, the straits are shown at the 52° lat. south.

On the 1708 map, the course and mouth of the Mississippi river are more accurately delineated than in the other.

Cóvens, J., *and* Mortier, C.—Continued.

From the above, it may be assumed that the map must have been issued after 1703 but before 1708.

The 1703? map has in the left lower margin: "se vendent . . . à Amsterdam chez Jean Cóvens et Corneille Mortier."

The Library of Congress has also a separate copy of this map.

no. [2] L'Europe, dressée sur les n: observations faites en toutes les parties de la terre, rectifiée par m^rs^. de l'Académie royale des sciences &c.

In 5 sheets; sheets 1–3: 23×20½; sheets 4, 5: 19½×20½.

In this map is shown S^t^. Petersburg, which was founded in 1703.

In the lower right corner is an engraving representing a group of mythological figures, the pope, the emperor and other dignitaries; in the center is an imperial double-headed eagle.

The fourth and fifth sheets have special titles: "Carte nouvelle de la mer Mediterranée divisée en mer de Levant et de Ponant . . . dressée par le s^r^. Sanson.—Partie orientale de la mer Méditerranée."

" [3] L'Asie, dressée sur les n: observ^ations^ faites en toutes les parties de la terre, rectifiée par m^rs^. de l'Académie royale des sciences, &c. Insets: "Carte des pays situés au nord nordest de la Chine, levée en voyage par le p. Verbiest." 4½×9.—"Groenland." 3½×5½.

In 5 sheets; sheet 1: 21×25; sheets 2–5: 21×19½.

Sheet no. [3] has separate title: "Carte nouvelle de la Grande Tartarie par . . . N. Witsen . . . à Amsterdam, dressée sur les degréez [!] de s^r^. Sanson."—Sheet no. [4] is entitled: "Troisième partie de l'Asie ou partie de la chine, les isles de Bornéo et Philippines, &c."

Shows a small part of Alaska: "Terre de la compagnie."

" [4] L'Afrique, dressée sur les n: observations faites en toutes les parties de la terre, rectifiée par mrs. de l'Académie royale des sciences, &c."

In 6 sheets; sheets 1, 2, 4, 5: 21×19; sheets 3, 6: 21×13½.

" [5] L'Amérique, dressée sur les n. observations faites en toutes les parties de la terre, rectifiée par m^rs^. de l'Académie royale des sciences, &c."

In 5 sheets: 20½×21. Latest date found 1701: "Isle de Beauchesne découverte en 1701."

Aa, P. van der.

Nouvel atlas, très-exact et fort commode pour toutes sortes de personnes, contenant les principales cartes géographiques. Dressé suivant les nouvelles observations de m^rs^. de l'Académie royal des sciences, & rectifié sur les relations les plus récentes des plus fidéles des voyageurs. 5 p. l., 4 pp., 98 maps, 1 pl. 4°. Leide, P. vander Aa [1714] 4277

NOTE.—The date is supplied from van der Aa, *Catalogue de livres de cartes géographiques des villes châteaux &c. de l'univers. Leide, [1715]*

Van der Aa's *Atlas nouveau et curieux des plus célèbres itinéraires*, contains a table of contents of this atlas in 2 v. giving 199 entries.

An edition of the atlas was brought out by Cóvens & Mortier about 1735, which corresponds with this atlas. The maps have had the name of van der Aa removed and that of Cóvens & Mortier substituted, and the name of map no.

Aa, P. van der—Continued.

96 changed from La Floride to La Louisiane. See v. 3, title 3488, also Lowery's *Descriptive list of spanish possessions . . . ed. by P. L. Phillips.*

The three additional maps not called for by the index are evidently part of the atlas as they occur also in an imperfect copy in the Library of Congress collection. This imperfect copy has several plates not called for by the index and which are called for by the index of the Cóvens and Mortier edition. Beside the illustrated engraved title-page on two leaves, the atlas contains an elaborately illustrated engraved dedication on two leaves, both hand colored.

The first five numbers in the table of contents call for the title, dedication, etc.

English, The, pilot. The third book. Describing the sea-coasts, capes, headlands, straits, soundings, sands, shoals, rocks, and dangers. The islands, bays, roads, harbours, and ports in the oriental navigation. Shewing the properties and nature of the winds and moussons in those seas; with the courses and distances from one place to another: the setting of the tides and currents; the ebbing and flowing of the sea. Also a new table of variations; and a correct table of longitudes and latitudes. With many other things necessary to be known. Being furnished with new and exact large draughts of ports, islands, and descriptions; gathered from the practice and experience of divers able and expert navigators of our english nation. Divided into three parts. The first part, shewing the nature and properties of the winds and moussons in the navigation from England to the East-Indies, and all over the Oriental ocean; and thereby how to shape a course from one port to another, according to the time of year in those seas. The second part, containing necessary instructions for sailing between England and the East-Indies, in the spring and fall. The third part, describing the sea-coasts, capes, headlands, straits, soundings, sands, shoals, rocks, and dangers. The islands, bays, roads, harbours, and ports, from Cape Bona Esperance, all over the Oriental ocean, being very much corrected and augmented with several additions: not heretofore publish'd. Collected for the general benefit of our countrymen, by John Thornton . . . 76 pp., 39 maps. fol. London, for R. & W. Mount & T. Page, 1716. 4278

NOTE.—The Library of Congress has a copy of the *English pilot. Third book*, dated 1748, without John Thornton's name on the title-page, and in which the maps are similar to those in this edition but many of them are re-engraved on new plates. In this 1716 edition many of the old Seller plates have evidently been used with Seller's name removed and that of Sam[l]. Thornton substituted. In the 1748 edition where these same plates have been used, Thornton's name has been eraced. Dalrymple accuses Thornton of copying Seller verbatim in a 1703 edition and giving him no credit. See v. 3, title 3455.

Tirion, I.

Nieuwe en beknopte hand-atlas. Bestaande in eene verzameling van eenige der algemeenste en nodigste landkaarten; alle in de Nederduitsche taal en na de alderlaatste ontdekking- en van de L'Isle en anderen opgesteld, en in een voegzaame grootte uitgegeven; om op eene gemaklyke wyze by het leezen der nieuwstydingen en historien te konnen worden gebruikt. 2 p. l., 112 maps. fol. Amsterdam, I. Tirion [1730–1769] 42S2

NOTE.—Tiele mentions another edition of this atlas of 1744 containing 67 maps, and Woltersdorf gives one of that date containing 74 maps.

The Library of Congress has a copy of the edition in which the register calls for 114 maps, which is quoted by Tiele, also this edition of 112 maps without date. Tiele states that in both of these editions the maps are dated from 1753–1754, but a comparison of the Library of Congress copies show that the dates of the maps vary from 1730 to 1769, and that the maps are the same in both copies with the exception of two.

The two extra maps are in the edition calling for 114 maps, and are as follows:

no. 4. Nieuwe wereld kaart, waar in de reizen van den hr. Anson rondsom de wereld . . .

" 93. Kaart van de Papoasche eilanden. 1753.

For list of maps of America see v. 1, title 600.

Wells, E.

A new sett of maps both of antient and present geography, wherein not only the latitude and longitude of many places are corrected, according to the latest observations; but also the most remarkable differences of antient and present geography may be quickly discern'd by a bare inspection or comparing of correspondent maps; which seem to be the most natural and easy method to lead young students (for whose use the work is principally intended) unto a competent knowledge of the geographical science. Together with A geographical treatise particularly adapted to the use and design of these maps. By Edward Wells, d.d. some time student of Christchurch, Oxon, and late rector of Cotesbach in Leicestershire. Imprimatur, Gu. Paynter . . . 2 p. l., 41 maps. fol. London, printed by T. W. for J. Walthoe, R. Wilkin [etc. 1738?] 4284

Note.—For extensive note on this edition, see v. 3, title 3489.
Contains the three maps which are wanting in the first copy as follows:
no. 33. Travels of the patriarchs and children of Israel, &c.
" 34. Land of Canaan, &c.

Kitchin, T., *& others.*

A general atlas describing the whole universe: being a complete collection of the most approved maps extant; corrected with the greatest care, and augmented from the latest discoveries. The whole being an improvement of the maps of d'Anville and Robert [de Vaugondy] 1 p. l., 23 maps on 35 sheets. fol. London [1790] 4300

NOTE.—The earliest issue of this atlas seems to be the one published in 1773. A number of editions followed. This edition is like the edition to which date 1768–1788 has been supplied from the maps, except for slight changes of date on several maps, five of them carrying the date 1790.
The issue of 1790 was also published by R. Sayer. The issue of 1795 being published by R. Laurie and J. Whittle successors to mr. Sayer.
An article in the Gentleman's magazine for may, 1858, states that this "publishing house dates from the commencement of english hydrography, (with perhaps the single exception of that excellent work, the '*English Coasting Pilot*' by Greenvile Collins, hydrographer to Charles II., published in 1693) . . . It is the oldest exhisting firm [1858] but one in Europe which has devoted itself to nautical works, the exception being the respectable and respected house of Gerard Hulst van Keulen and co., of Amsterdam."

Antillón y Marzo, I. de.

[Atlas of the world] 16, 32, 30, 52, [1], 31 pp., 5 fold. maps. 8°. [Madrid, real seminario de nobles, 1804] 4305

NOTE.—Maps dated 1801 & 1802. Engraved and drawn by J. Morata, Cardono, F. Selma, P. Gangoiti.

"On February 1, 1804, the 'Ephemerides de la ilustración de Espana' announced to its readers that Isidoro Antillon not only explained his plan [for the teaching of geography] based on sound geographical principles in relation with history, commerce, military, etc., but that he presented a map of the Pacific ocean, with an explanatory text, which gave him the idea of compiling an atlas to accompany his geographical works."

"He began by collecting and drawing maps with great accuracy, and this work may be called the first spanish atlas. To the Seminario de nobles belongs the honor of offering to the nation the realization of this useful and high project."

"Each map is accompanied by an analysis or memoire containing the extensive knowledge of the author." See Beltram y Rozpida, Ricardo. *Isidoro de Antillon. Madrid, 1903. p. 29.*

With reference to this atlas Navarette in his *Biblioteca maritima española. 1851. p. 668*, says:

"El atlas debia constar de treinta cartas, qui si se hubierdo concluido se tendria el primer atlas que podria llamarse español del cual estaban ya publicados y venales en la imprenta real cinco cuadernos."

4462

NOTE.—Copy 2. Issued in 5 pts. dated 1818–1823. Pts. I, II pub. by "Tanner, Vallance, Kearny & co., no. 10 Library street," 1818 and 1819 respectively; pt. III pub. by "Henry S. Tanner, no. 29 South Tenth street, 1821"; pt. IV by "H. S. Tanner, no. 8 Sansom street, 1822"; and pt. V by "Henry S. Tanner, no. 99 Walnut street, 1823."

Pt. I contains an announcement: "New and elegant American atlas now publishing by Tanner, Vallance, Kearny and co. engravers, Philadelphia," dated "July 10, 1818."

Pt. III has a notice "To the public" dated "January 1st. 1821." On the reverse of the back cover is a "List of maps and geographical works lately published and for sale by H. S. Tanner."

On the title-page below the date of imprint is the following: "Writing drawn and engraved by Joseph Perkins."

The maps of the world, South America, New York, America have the following imprint "Engraved & published by Tanner, Vallance, Kearny & co., Philadelphia"; in the other 1823 edition of this atlas in the Library of Congress, these maps have "Published by H. S. Tanner Philad^a."

Some of the maps differ from those in the other 1823 edition. On the map of South America, the title reads "South America and West Indies, 1818." The "Note" placed near the coast of French Guiana reads "The boundary line between the Spanish & Portuguese possessions is arranged agreably to the Treaties of S^t. Ildefonso in 1778 and that with France in 1815"—The lower right corner does not contain the inset diagram and table of "Comparative altitudes of the mountains, towns &c of South America" as shown in the other edition.

The map of New York contains in the lower left corner outside the border, "Constructed from materials furnished by J. H. Eddy esq^r., of New York, and from the works of De Witt, Darby, Spafford, Lay, Smith, Bouchette & other authentic sources."—The "Boundary as fixed by the Commissioners under the 6th article of the Treaty of Ghent" shown in lake Ontario on the map of the 1823 ed., does not appear in this map.—The map also shows different county lines.

In the lower left corner of the map of Ohio & Indiana outside the border is the following: "Constructed from materials furnished by A. Bourne & S. Williams, esq^rs. of Chillicothe; and from the works of De Ferrer, Ellicott, Volney, Darby, Brown, Drake, Cramer, Kilbourn &c. &c."—Shows also different land cession lines and boundaries; "Delaware's cession. 1818" and "Line of Pattawatima cession. 1818."

The map of Louisiana and Mississippi does not show the line of Chocktaw bounds as marked in the other edition.

Maps of pt. v. have in the lower right corner outside the border: "Engraved by H. S. Tanner & assistants."

NOTE.—Five of the set of six views drawn by captain Smyth with english and french titles, also two other views by him.
The first view of the set of six entitled, "A view of the city of Quebec," carries the dedication: "To the right honourable William Pitt, one of his majesties most honourable privy council & principal Secretary of state. These six views of the most remarkable places in the gulf and river St. Laurence are most humbly inscribed by his most humble servant Hervey Smyth. Aid du camp to the late gen^{l}. Wolfe."
The sixth view belonging to this series, which is wanting, is a view entitled, "A view of Pierced Island, a remarkable rock in the gulf of St. Lawrence."
Of the two additional views, the one entitled, "A view of the landing place," etc., is "Inscrib'd to the right hon^{ble}. field marshal lord viscount Ligonier,"

Smyth, H.—Continued.

and the other, "A view of Quebec from the Bason," was published by T. Bowles.

Captain Hervey Smyth, afterwards Sir Hervey, entered the army in 1753, and retired in 1769. He made a number of sketches of Quebec in 1759. The sketches in this series were engraved by Paul Sandby, 1725–1809, Pierre Charles Canot, b. ca. 1710, William Elliot, 1727–1766, Peter Mazell and P. Benazech. For information concerning these men, see Bryan's *Dictionary of painters and engravers.*

Wall, W. G.

[The Hudson river portfolio from drawings made by W. G. Wall] 20 pl. ca. 14⅜ x 21½ each. [New York, H. I. Megarey, 1828] 4958

Note.—An uncolored set of these plates without title, or the descriptions which come with the earlier edition.

First published in parts of four prints each from about 1821 to 1825.

The first issue of the views was in aquatint. They were advertised to be engraved by I. R. Smith, most of them are, however, engraved by I. Hill.

An edition issued in 1828 has the words "and transferred to G. & C. & H. Carvill, New York," added to the imprint.

In the present edition the name, G. & C. & H. Carvill, New York, has been erased from all the plates except no. 15, "View from Fishkill looking to West Point," and no. 16, "West Point," leaving the phrase, "and transferred to," on all the other plates.

On views nos. 2, 3, 5, 11, the imprint reads, "Published by H. I. Megarey & W. B. Gilley, New York, and John Mill, Charleston, S. C. All views are painted by W. G. Wall. Engraved by I. Hill," except nos. 2, 3, 5 and 11. See contents for titles.

Views nos. 2, 3, were "Painted by W. G. Wall. Finished by J. Hill." Nos. 5, 11, "Painted by W. G. Wall. Eng. by I. R. Smith. Finished by J. Hill."

Pl. no. 20, "New York, from Governors Island," is reproduced in Stokes, *The iconography of Manhattan Island*, v. 3, pl. 89, with a bibliographical note on pp. 571–575.

Havre de Grace, G. Gruchet, 1709. 5163

NOTE.—First published 1684.

The imprint is printed on a slip and pasted over the imprint of the edition of 1702, which reads, "Au Havre de Grâce, chez Jacque Hubault, marchand libraire, imprimeur du roy et de la ville, MDCCII. Avec privilège de sa majesté." An "Extrait du privilège du roy," at the end of the volume, is also dated 1702. For bibliographical information, see v. 1, title 2852.

Goos, P.

The lighting colomne or sea-mirrour, containing the sea-coasts of the northern, eastern and western navigation; setting forth in

Goos, P.—Continued.

divers necessarie sea-cards all the ports, rivers, bayes, roads, depths and sands; very curiously placed on its due polus-height furnished with the discoveries of the chief countries, and on what course and distance they lay one from another: never heretofore so clearly laid open, and here and there very diligently bettered and augmented, for the use of all sea-men. As also the situation of the northernly countries, as Island, the Strate Davids, the isle of Ian Mayen, Bear-island, Old-Greenland, Spitsbergen and Nova Zembla: adorned with many sea-cards and discoveries. Gathered out of experience and practice of divers pilots and lovers of the famous art of navigation. Whereunto is added a brief Instruction of the art of navigation, together with new tables of the suns' declination. also an Almanack extending to the year 1661. 2 v. in 1. eng. title [46] 103 (*i. e.* 115) 108 pp., 57 (*i. e.* 60) maps, 4 maps in text. diagrs. fol. Amsterdam, P. Goos, 1660–[1661] 5164

Note.—The first edition of the *Lichtende colomne, ofte zee-spiegel*, was issued in dutch in 1654 and was followed by two editions 1656–1657, and 1664. See v. 3, title 3984.

The same engraved plate which, with the center blank, precedes the title-page in the dutch edition of 1656–1657, is used in this edition with the english title printed on a slip and pasted over the blank center.

The maps are not all arranged in the right order according to number and index. They are numbered in arabic figures. One map is called for by the index following no. 23, and is numbered in roman letters xxiii. This map is entitled. *Caerte van Archangel*, and is wanting in this copy.

Map no. 9, *De custen van Noorwegen tusschen Neus en Schuitenes*, and no. 18, *De custen van Noorwegh tusschen Dronten en Tromsondt* are wanting. In place of the latter a map entitled, *De custen van Finmarken tusschen Dronten en Sanien*, has been inserted. Map no. 25, *De custen van Denemarcken en Sweden*, is the same map as the corresponding map in the dutch edition of 1656–1657 with a different cartouche and lettering in the title. All other maps in this english edition correspond with those in the dutch edition of 1656–1657, except that they are the second impression of the plate, and that on map no. 2, *Pascaarte van de Noortzee*, the date has been changed from 1656 to 1660, and map no. 24, *Pascaarte vande Oost-zee*, from 1656 to 1661.

Tiele, Bierens de Haan and Muller give a number of editions of the Goos atlases but do not give this english edition.

[1]—Totten leser, p. [2]— Omme die declinatie recht te ghebruycken, p. [3–5]—Privileges, one dated 20 dec., 1579, the other 7 may, 1580, p. [6]—Aen den boeckbinder, p. 7.

The plates included in the text are perfect, the first, Tamme drayende compasse oft instrumenten metten ghesternte, having intact the movable compass so often missing on plates of a like character in early works.

Nineteen of the 23 maps in v. 1 and all the 21 maps in v. 2 are signed by Joannes a Doetecum as engraver.

In v. 1, 2 maps are dated 158–, 1 map 1580, 1 map 1581, 12 maps 1583, and 7 maps are without date. In v. 2, 1 map is dated 158–, 4 maps 1583, 1 map 1584, 1 map 1585, and 14 maps are without date.

This copy of the atlas carries the Huth book plate.

The atlas is very rare and the few descriptions of its contents vary somewhat.

The entry in the Bibliotheca Hulthemiana agrees with this copy except that map no. 23, which is the first map in v. 2 of the Hulthem copy is the last map in v. 1, of this copy, which is the arrangement according to the index. The only other difference noticeable, from the Hulthem catalogue entry, is that of the inserted page in this copy. The inserted page is headed: *Beschryuinghe van Eyderste, Ditmaer ende zee-custen daer ontrent gheleghen ligghende op haer winden, mylen ende streckinghe.* The first edition consisting of the first volume only was published in 1584. This edition, 2 v. in 1, in 1585, and Tiele sites an example of an issue dated 1585 with the latin title, *Pars prima. Speculum nauticum super navigatione maris Occidentalis etc.* . . . and with 19 pages of text in v. 2.

Waghenaer, L. J.—Continued.

For extensive notes on the latin edition of 1586, see v. 3, title 3980, and on the english edition with additions by sir Anthony Ashley, title. 3981.
The maps are the same as those in the latin edition of 1586, the contents of which is given in v. 3, title 3980, except that the maps in the latin edition have many additional inscriptions; on map no. 21, v. 1, in this edition the title reads, "Beschrÿuinghe der zee custen van Englandt, tusschen Pleÿmouth eñ Porthlandt, met zÿne principale hauenen elex in heure gedaente," and in the latin editions 1586 on the corresponding map, a latin title has been inserted before the dutch, reading: "Angliae maritimæ inter Plemoutham et Portlandiam simul et praecipuorū portium, vera effigies et delineatio"; map no. 19 of v. 2, in this edition, *Descriptio ditionum littoralium maris Germanici*, differs considerably from the corresponding map in the latin edition; map no. 22 of v. 2 in the latin edition not appearing at all in this copy of the 1585 edition. The descriptive text on the reverse is a translation into latin of the inserted page in this copy of the 1585 edition.
Atlas listed in G. D. Smith's sales catalogue and purchased in 1915.

La Feuille, P. de.

The millitary [!] tablettes, containing a choice of mapps, for the use of officers and travellers: containing also the gennerall [!] mapps of the world, and with the particular ones of the places where the theatre of the warr is at present in Europe. With the plans of the fortresses the most exposed in the present revolutions. Enriched with the millitary [!] architecture of a new and abriged [!] methode very easy to learn geography, and to attain inso [!] a speedy knowledge of the globes. 4 p. l., 29 maps, 1 pl. sm. 4°. Amsterdam, D. de La Feuille, 1707. 5167

NOTE.—This atlas was taken from the *Atlas portatif ou le nouveau théâtre de la guerre en Europe*, published by Daniel de La Feuille in 1706.
Editions were brought out in 1711 and 1732 in dutch, in 1708 in french, and in 1717 in both french and dutch titles and text. For editions of 1708, 1717, 1732, and the Atlas portatif of 1706, see Index.
The same maps are used in all editions.
Many of the maps are ornamented with coats of arms or very small engravings of cities and towns.
The following maps relate to America:
no. [1] Mapemonde planisphère.
" [6] L'Amérique méridionale.
" [7] L'Amérique septentrionale.

La Feuille, P. de.—Continued.

Les tablettes guerrières, où cartes choisies pour la commodité des officiers et des voyageurs, contenant toutes les cartes générales du monde, avec les particulières des lieux où le théâtre de la guerre se fait sentir en Europe. Avec les plans des fortresses les plus exposées aux revolutions présentes. Enrichis de l'architecture militaire, & d'une nouvelle methode abrégée pour aprendre facilement la géographie, & pour avoir une prompte connoissance des globes. Augmenté dans cette edition des 102 articles des ordonnances militaires de L. H. P. pour maintenir le bon ordre dans l'armée. 16 pp., 32 maps, 1 pl. 12°. Amsterdam, D. de la Feuille, 1708. 5168

NOTE.—The statement in the title that this edition is augmented shows that an earlier edition had appeared. The Library of Congress has two later editions, one published in 1717 and the other in 1732. Both of these differ slightly and contain more maps. The only map in this edition which does not occur in the others is map no. [25] "La Livonie." It does not appear in the 1732 edition.

[11]

The first part of Mercator's atlas entitled, *Galliae tabulae geographicae*, containing also *Belgii Inferioris geographicae tabulae*, and *Germaniae tabula geographicae*, was published in 1585 and the second part in 1589.

Raemdonck gives the date of the publication of the second part as 1590 and that date was given in the preceding volumes for entries under Mercator. Raemdonck took the date from *Vita Gerardi Mercatoris à Gualtero Ghymmio conscripta*, reading, *Hisce peractis, Italiæ generalem ac particulares tabulas æri insculpere aggressus est, prosperoque successu, anno nonagesimo, mense Aprili, easdem absolvit, et Potentissimo ac Serenissimo Ferdinando Medici, Duci Etruriæ dedicavit.* Anno nonagesimo, the ninetieth year, would however be 1589. A later publication, Ortroy's *Bibliographie sommaire de l' oeuvre mercatorienne*, gives the date as 1590, but Denuce's *Oud-Nederlandsche kaartmakers in betrekking met Plantijn*, gives 1589 and as his authority, an entry in the Plantin Archives which reads as follows, Plant. Arch. LXVI (Journal 1589) f° 149ᵛ. Adi 4° novembre. d° Abrahamo Ortelio: 1 Mercatoris Italia . . . fl. 8.

Blaeu, W. J.

The light of navigation wherein are declared and lively pourtrayed all the coasts and havens of the west, north and east seas. Collected partly out of the books of the principall authors which have written of navigation . . . partly also out of many other expert seafaring mens writings & verbal declarations . . . divided into tvvo bookes. Hereunto are added (beside an institution in the art of navigation) new tables of the declination of the sunne . . .

by William Iohnson. 3 pts. in 1 vol. obl. 4°. Amsterdam, W. Iohnson, 1622. 5177

Note.—Collation: eng. title, [2]–162 [*i. e.* 158] pp. 130, [1] pp. incl. 41 maps. Signatures: A–D⁴, E–G⁶, H², I⁶, K², L⁴, M–Q², R⁸, S², T⁴, V², X⁸, Aa¹, Bb⁴ Cc⁶, Dd–Ff², Gg⁶, Hh², Ii², Kk⁴, Ll², Mm⁶, Nn–Pp², Qq⁴, Rr², Ss⁶, (1 extra leaf) Tt², Vv², Xx².

The title page has view of Amsterdam in lower margin; reverse, blank. Title is pasted over dutch title bearing date of 1620. On second l. is an engraving representing a lesson in hydrography. On the verso: "To the reader." A 3 recto —E3 verso: A briff and short introdvction for the vnderstanding of the celestial sphere . . . ; E4 recto—[X8] verso: The first book of the light of navigation, wherein are described and drawn al the coasts and hauens of the west seas: as of Holland, Sealand, Flanders, France, Spain, and Barbarie . . . with the south and west coasts of Ireland and England . . . 1622; Aa [1] recto—[xx] verso: the second book of the light of navigation, wherein are described all the coasts hauens and ilands of the north and east seas: as of Freesland, Iutland, Denmarke, Pomerland, Prussia, Leefland, Sweathland, Norvvaie, Lapland and Moscovia, as also, all the north and east coasts of Scotland and England . . . 1622; [xx2] recto: A table of the light of navigation, contayning the arguments of every chapter; verso: blank.

According to P. Q. Tiele the first edition in dutch was published in 1608, and contains the same view of Amsterdam and same number of maps and plates. (*cf.* his article entitled: *De eerste uitgave van Blaeu's licht der zeevaert*, in *Bibliographische adversaria, v. 5. 1883–6. pp. 293–5*)

Maps have french and dutch titles, contained in ornamented cartouches. Although similar in construction to the maps in the L. C. copy of 1622, those of this edition have additional illustrations; the cartouches also have been changed.

On map no. 15 is a plan of "Angra."

Not mentioned in P. A. Tiele's *Nederlandsche bibliographie, 1884*, and no copy is listed as being in the British Museum or in the Bibliothèque nationale. Inserted in the text are numerous views and aspects of the coasts.

The name William Iohnson appearing on the title-page is an english translation of the christian names of Blaeu, which are Willem Janszoon in dutch. On the french copy of this atlas, in the Library of Congress, the names are given as "Gvilliavme Ianszoon. According to P. J. H. Baudet, in his *Leven en werken van Willem Janz. Blaeu, 1871.* p. 118: "Blaeu signed very often "Willem Jansz." or Guil. Janssonius." The address given in the imprint of this atlas "upon the water . . . at the Signe of the golden sundyall," corresponds to the address of other works of Blaeu.

Tavernier, M.

Théâtre géographiqve dv royavme de France, contenant les cartes et descriptions particulières des prouinces d'iceluy, auec celles des frontières & païs adjacents; le tout suiuant la table contenüe en l'autre part. title, 1 l., 101 (*i. e.* 90) maps. fol. Paris, M. Tavernier, 1638. 5222

NOTE.—Imperfect, maps no. 7, La France de Strabon, no. 29, l'Orléannois, no. 42 Le païs de Messin, no. 82 Lorraine générale, are wanting.
On the leaf following the title is a printed "Table de tovtes les cartes des provinces de France."
Maps are by various cartographers including I. Hondius, P. Bertius, Cornelis Danckertz, H. Hondius, Nicolas Sanson, Jan Jansonius, Petit Bourbon, Hardy, Jean Jubrien, I. van Damme, d'Armendale, Beins, Tassin, Evert Symons, Joannes Tardo, J. Le Clerc, de Classun, I. Fayanus, I. Surhonius, J. C. Visscher, de Chattillon, Gaspar Baudoin.
Maps variously dated 1623–1640.
The three following maps by P. Bertius are dated 1640:
no. [2] Carte de l' Evrope.
" [3] Carte de l' Asie.
" [4] Carte de l' Afriqve.
The first edition of this atlas, issued in 1634, is fully described by sir Herbert George Fordham, in the *Proceedings of the Cambridge antiquarian society 1908–9. v. 13, p. 106*, in an article entitled:
Cartography of the provinces of France, 1570–1757, from which the following is quoted:
"Although his (Tavernier's) work in the engraving and publication of maps was, undoubtedly, very considerable, as an engraver he cannot be said to have had much artistic merit, and as a publisher of maps very little originality can be claimed for him . . . It may be assumed that he assisted in laying a good foundation, by the collection and re-engraving of maps of various cartographers and engravers—principally, following Le Clerc, with additions from the Dutch and Flemish schools—for the work of Nicolas Sanson, who succeeded him, particularly as regards the maps of the Provinces of France, to which subject it appears from his title pages that he mainly devoted himself . . .
The collation of the maps in the various volumes containing some at least engraved by Tavernier is, however, exceedingly difficult, as the maps attributed to him and those associated with them are largely from foreign sources bearing frequently the names of the Hondiuses, Janssons, Blaeus, and others of the same period. As regards the total number of maps which Tavernier copied,

and, so far, assimilated as a part of his cartographic publications I do not like even to make a guess—it may run to as much as a couple of hundred. Indeed nearly a hundred such titles of maps connected with France itself can be collected—but it is, of course, doubtful whether anything like this number came from Tavernier's press. He does not seem to have published a general atlas of the world, although his atlases of France and the surrounding and frontier countries are prefaced by maps of the world and of the several continents . . . If Tavernier had any distinctive style of his own, it must be sought for in the maps he seems actually to have engraved in connection with the military movements during the reign of Louis XIII, maps coarsely drawn, but clear, and without superfluous ornament. These maps of the 'seat of war' deal with the famous siege of La Rochelle, with the campaign of a few years later in Italy, with the war in the Grisons, over the question of the possession of the Valteline, and with some naval operations for the conquest from the spaniards of islands on the Mediterranean coasts. The earliest of this series of maps were engraved in 1625. They present a certain interest as probably the first systematic work of this kind, especially if they are studied with the military and political memoirs of the period, as, for instance, the Mémoires du mareschal de Bassompierre (1579–1646), who played a leading part in the wars of the period."

Of these "war maps" (listed in the above-mentioned article), this atlas contains the following:

no. [66] Carte du pais d'Aunis et gouvernement de La Rochelle.
" [67] Carte de la coste de La Rochelle à Brouaigs et de l'isle d'Oléron. 1627. Observée par de les Chattillon, ingénieur du roy.
" [88] Charte de la Suisse, de la Rhétie, ou des Grisons, de la Valteline, du Valay par Gaspar Baudoin, ingénieur militaire. 1625.
" [89] Carte générale de la Valtoline. 1625.

"Tavernier's cartographic activity extends from at least as early as 1625 till his death, at an advanced age, in 1641. He thus filled the period between Jean Le Clerc (who died in 1621 or 1622) and Sanson, whose greatest activity in map production culminated in the early fifties of the century." (Fordham Op. cit.)

Besides maps of France, this atlas also contains maps of the world, the continents, and various maps of the Netherlands, Germany, the Rhine & Danube rivers, Italy.

Contains plans of the following cities:

no. [72] Plan de la ville de Lymoges [Ant. Jo. Fayano]
" [75] [Views of] Ghendt—Brugge—Oostende—Sluys—Yperen—Duynkercke. By Claes. Janss. Visscher. 1633.

The following maps relate to America:

no. [1] Nova totius terrarum geographica tabula. Auct. Ind. Hondio. 1638.
" [2] Carte de l'Evrope. P. Bertius. 1640. [Shows part of Greenland.]
" [3] Carte de l'Asie. P. Bertius. 1640. [Shows Partie de l'Amériqve.]
" [5] Carte de l'Amériqve. P. Bertius.

Date on cover and on index map, 1843.

In 1796 a revision of the map of Bavaria was ordered by the Austrian general staff. A topographical office was established in 1800 under the leadership of colonels Bonne and Henry in Munich. These two men with the aid of von Riedl laid the foundation and plans for a topographical atlas of Bavaria. The first map completed was a plan of Munich. This with Munich and vicinity and Wolfrathausen was published in 1812. The work was continued under the directorship of von Riedl, Seiffer, and others. In 1867 the atlas was completed.

Merian seel:erben [1652 ?] 5253

NOTE.—The 13th part of Merian's *Topographiæ*. Preface is dated 1652.

Matthaeus Merian (1593–1650) began the compilation of his "Topographiæ" in 1642, but died before the completion of the work, which was continued by his sons Matthaeus and Caspar and finished in 30 volumes in 1688.

The text of the *Topographiæ* was compiled by Martin Zeiller for Merian, excepting that for the part relating to Alsace, which was compiled by Merian himself.

Many of the plates which greatly contributed to the fame of the work were engraved by Merian.

Map no. [73] bears the date 1703 and must have been inserted later; the descriptive text does not correspond to that date.

Detailed bio-bibliographical information relating to Merian is found in H. Eckardt's *Matthaeus Merian, eine Kultur historische studie. 8°. Kiel, 1892.*

The title-page of the above work was designed by "Mathæus Merian iunior" . . . and engraved by Melchior Kusell . . ."

Bound with it is the *Topographia Heluetiæ, Rhætiæ et Valesiæ . . . 1642.*

1827–1862

Great Britain. *India office.*

[The Indian atlas. 2 v., 30 maps; 38 maps. fol. London, J. Walker, 1827–1862] 5301

NOTE.—Volume 1 contains the northern part of India and V. 2, the southern part.

Contains the early sheets of the Indian atlas published up to 1862, which have been superseded by later editions from time to time. The editions of the sheets published between the years 1827–1836 were published by James Horsburgh, who preceded John Walker, in the Geographical department of the India office.

Sheet no. 27 wanting.

Index sheets are pasted in the reverse of front covers.

Sir Clement Markham, in his *Memoir on the Indian surveys*, gives the following comprehensive statement concerning the Indian atlas: "The labours of the topographical surveyors of the Madras military institute, based on the triangulation of colonel Lambton, began to attract attention as soon as their results arrived in England, and the necessity for the publication of more accurate and detailed maps of India than had hitherto been produced was soon acknowledged. Aaron Arrowsmith was of course consulted. He constructed a projection for a new atlas of India, on the scale of four miles to an inch, and the Madras survey maps were placed in his hands. The result was the publication of his atlas of South India, . . . which appeared in July, 1822.

"The question of the publication of the results of the great trigonometrical and topographical surveys, which had now been in progress for upwards of 20 years, was carefully and anxiously considered by the Court of directors, and colonel Salmond, then military secretary, was, for some years, in consultation with colonel Mackenzie, the surveyor general at Calcutta, on the subject. Colonel Hodgson, Mackenzie's successor, returned to England, in the hope and expectation that the great work would be entrusted to him. It, however, would no doubt have been given to Aaron Arrowsmith, who had already made the projection, and indeed published several sheets in the best style of the day; but, just at that time, the veteran cartographer died. The East Indian directors then appointed mr. John Walker to compile and engrave the sheets of the great atlas of India.

"Mr. Walker came of a family of map engravers. His father had worked for Dalrymple . . . The son was thoroughly trained and the amount of judgment and ability he brought to the great task he undertook is shown by the often disputed but ever approved excellence of his work.

"The Indian atlas was designed to occupy 177 sheets, 40 inches by 27, and the globular projection and scale (4 miles to the inch), originally proposed by mr. Aaron Arrowsmith, were adopted. The scheme embraces the region from Karáchi to Singapore, and includes Ceylon. From 1825 mr. Walker combined the various documents sent home by the surveyor in India, prepared the sheets for publication, engraved them on copper, and issued them to the surveyor general in India and to the London agent.

"The first sheets of the atlas were of course those for which the Madras topographical surveys furnished the materials. The first was published in 1827. Then followed one of Bandalkhand from captain Franklin's work, and the Himalayan region from Hodgson's and Herbert's surveys. These, however,

Great Britain. *India office*—Continued.

have since undergone complete revision. In 1860, and again in 1863, remonstrances were received from India at the delay in the execution of the sheets after the materials for them had been sent home. With a view to obviating this delay, a proposal was made by the surveyor general in july, 1864, that the sheets of the atlas should henceforth be brought out in quarter sheets. Mr. Walker concurred that this arrangement would expedite the work, and it was accordingly adopted. There has always been the highest testimony to the accuracy and excellent style in which mr. Walker has produced the atlas sheets.

"Mr. John Walker died, in his 86th year on april 19th, 1873, having been in the employment of the East India company and of the India Office for 48 years.

"In 1868 the question was raised whether the time had not come when the remaining sheets of the Atlas might with advantage be taken up by the surveyor general himself, and engraved at Calcutta. Hitherto the difficulties in the way of such a course had consisted in the want of means and the absence of an efficient staff. These difficulties had to a great extent been surmounted during the time that colonel Thuillier had been in charge.

"The change was accordingly sanctioned, and colonel Thuillier was deputed to make the necessary arrangements in England during the year 1868. He arranged with mr. Walker that all plates of sheets of the atlas actually in progress or for which materials had been sent to England, should be finished by mr. Walker; and that the rest should be undertaken by the surveyor general in India. Thus time was given for colonel Thuillier to organize his increased staff at Calcutta. Up to that time mr. Walker had completed the engraving of 84 of the atlas sheets.

"Colonel Thuillier returned to India with a staff of carefully selected english engravers, in January, 1869 . . .

"In 1870 the first quarter sheets of the Indian Atlas engraved in India . . . were issued."

Markham's *Memoir*, 1878, contains a reduced index map to the whole atlas at that date.
